SUMMARY

Java Full Stack Developer with hands-on experience building scalable, well-tested web applications using **Java, Spring Boot, REST APIs, React.js and PostgreSQL/MySQL**. Skilled in designing microservices, event-driven systems with Kafka, and deploying production applications on Docker/VPS infrastructure with CI/CD pipelines. Experienced in writing unit and integration test suites and using telemetry (Grafana/Prometheus) to drive operational excellence. Delivered end-to-end client and personal projects spanning backend architecture, API design, database optimization and cloud deployment.

EDUCATION

Galgotias College of Engineering and Technology <i>Bachelor of Technology in CSE (Artificial Intelligence & Machine Learning)</i>	Greater Noida, India 2022 – 2026
Rani Lakshmi Bai Memorial School <i>CBSE Class XII – Aggregate: 90.8%</i>	Lucknow, Uttar Pradesh, India 2020 – 2021
Shree Sanatan Dhram Education Center <i>CBSE Class X – Percentage: 90.5%</i>	Kanpur, Uttar Pradesh, India 2018 – 2019

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL
Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, REST APIs, Microservices
Frontend Technologies: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3
Messaging & Caching: Apache Kafka, Redis
Databases: MySQL, PostgreSQL, MongoDB, InfluxDB
Cloud & DevOps: AWS, Docker, Google Cloud, Nginx, GitHub Actions (CI/CD), VPS Deployment
Monitoring & Observability: Grafana, Prometheus, Telemetry & Metrics-driven Operations
Testing & Quality: JUnit, Mockito, TestNG, JaCoCo (Code Coverage), Test Automation, Postman/Newman, Swagger/OpenAPI
Tools: Git, GitHub, Maven, VS Code, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Mahhayatrah <i>Full Stack Developer</i>	Aug 2025 – Feb 2026 Delhi, India
- Developed and maintained secure, scalable, and responsive web applications using Java, Spring Boot and React.js, delivering full-cycle features from database design to production deployment. - Designed and integrated RESTful APIs to connect frontend interfaces with backend services, improving data consistency and reducing response latency. - Wrote unit and integration tests with JUnit and Mockito as part of the development workflow, improving code coverage and catching regressions before release. - Optimized application performance through database query tuning, caching strategies, and efficient state management on the frontend.	
Cognizant <i>GenC Trainee (certificate)</i>	Feb 2026 – June 2026 Chennai, India
- Completed enterprise-grade training in Java software development, backend engineering, and cloud technologies as part of Cognizant's Generation-C program. - Built and deployed sample applications applying object-oriented design principles, REST API development and cloud fundamentals in a professional software delivery environment. - Practiced designing test cases and automation frameworks as part of the training curriculum, reinforcing software delivery quality and testing best practices.	

PROJECTS

CATLIN Pharmaceuticals | *Java, Spring Boot, Next.js, React, TypeScript, PostgreSQL, Docker, Nginx* Client Project

- Led end-to-end redesign and development of a corporate pharmaceutical website and admin platform, delivered as a full-stack client .
- Built a secure Java/Spring Boot backend exposing REST APIs consumed by a Next.js and React frontend, covering product catalog, content and enquiry management.
- Developed a custom admin panel/CMS with authenticated access, enabling non-technical staff to manage products, website content, blog posts and enquiries without developer support.
- Architected the database schema on PostgreSQL/MySQL and implemented SEO-ready page structures, sitemap and metadata configuration.
- Deployed the full application stack to a production VPS using Docker and Nginx reverse-proxy, configuring domain, SSL/HTTPS and automated deployment via GitHub Actions CI/CD.

Job Application Tracker | *Spring Boot, React.js, PostgreSQL, Spring Data JPA, REST APIs* Live

- Developed a full-stack job application tracking system using Spring Boot, React.js, and PostgreSQL to manage job applications, interview stages, and application statuses.
- Built secure RESTful APIs with Spring Boot and Spring Data JPA, implementing optimized CRUD operations for efficient data management and seamless frontend-backend integration.
- Designed a responsive React.js dashboard providing application analytics, progress visualization, and an intuitive user experience with real-time updates.

EcoPulse | *Spring Boot, MySQL, Spring AI, InfluxDB, Kafka, Redis, OAuth, Grafana, Prometheus, Docker* GitHub

- Developed six Spring Boot microservices with clear separation of concerns, including User, Device, Ingestion, Usage, Alert, and API Gateway services.
- Built an event-driven architecture using Apache Kafka to asynchronously process **160K+ energy usage events**, improving scalability and decoupling between services.
- Implemented threshold-based alert generation using Kafka events to notify users when energy consumption exceeded configured limits.
- Wrote JUnit/Mockito unit and integration tests across services to validate business logic and safeguard against regressions during development.
- Dockerized the complete backend and integrated Prometheus with Grafana for telemetry, monitoring application health, request rates, and JVM performance to drive operational visibility.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Sponsorship Club – Club Head

Sept 2024 – Sept 2025

Galgotias College of Engineering and Technology

- Led a team of 15+ members to secure corporate sponsorships totaling over INR 5 lakhs for major college events.
- Successfully secured sponsorships for Galgotias Creators Hackathon, Galgotias International Hackathon, Unifest 2022, and Unifest 2023.
- Developed partnership proposals and maintained relationships with corporate sponsors and industry partners.
